📅 Date of birth 02/09/1999  
🏠 Serbian

## About me

I am an enthusiastic person with a lot of ambition, and proactive attitude enables me to excel in the workplace, completing tasks from the approachable view. Recently I have caught my interest in 3D design and digital drawing, but those are just hobbies for now.

## Education

**Medical Technician** Sveti Sava High School Bujanovac, Serbia

From September 2016 to June 2018

Four years of High School study based in medical research and science.

**Electrical and Computer Engineer** Academy of Technical and Artistic Vocational Studies,  
Department of ICT Belgrade, Serbia

Since October 2018

I am at my third year of ICT, studying computer science and web development. On studies i learn a lot about gaining ability to think abstract and logical as well as for the enormous effort and time people use as creators.

## Skills

**Front-End Development  
using Mark-up Languages:  
HTML, CSS, JavaScript**

Knowledge of Mark-up language helps to understand and create web applications and other front-end software

**Creating Windows C #  
based applications**

Creating an object-oriented application for reading and processing data while using the Visual Studio environment.

**Work with processed  
processing in databases  
data: MySQL, Microsoft  
SQL Server**

Manipulation of background data transfer to server and database.

**Microsoft Office Package**

Experienced work with these environments and high-level data processing itself.

**Back-end Development:  
PHP Language**

Working on data access and business logic with databases

## Languages

**English**

Proficient

**Serbian**

Native
